...in Germany

»It's not just one major feature that makes the difference, it's a whole set of factors that define Cool Compact«

Markus Sidler, Managing Director

Cool Compact is your competent partner in and around refrigeration technology. Our expertise is founded on decades of experience, manufacturing »Made in Germany« and qualified, long-term employees.

Because of flexible manufacturing processes, extensive stocked inventory and short lead times, our products are available within a few days. At our manufacturing facility, we use modern CNC-sheet metal processing machines. For a high energy efficiency and sustainability, the bodies of all of our refrigeration units are insulated with high-pressure foam. Prior to delivery, all units with built-in machines are being tested between four to eight hours, therefore

allowing us to offer an extensive warranty to our customers.

Cool Compact's name represents quality, cutting edge technology and customer orientation. Cool Compact's appliances provide a high utility value, a long service life and good energy efficiency. Cool Compact stands for experienced employees, a collaborative work environment and good teamwork with a constant focus on our customers and partners.

Take advantage of our experience!

Yours,

Shareholding Manager

From an oven to refrigerators

A young, modern company – backed by almost 125 years of experience. Important and significant milestones chronicle the long

success story of a Swabian company that has turned from an up-and-coming manufacturer of commercial ovens for bakeries, and providing stainless steel (AISI 304) equipment for commercial kitchens and cafeterias, into a specialist in the manufacturing of premium commercial refrigeration units.

J. Rilling Oven Factory

Over 120 years ago, in 1896, Jakob Rilling lays the foundation for Cool Compact's success story by starting the manufacturing of bakery ovens in Nehren / Tübingen.

J. Rilling and Son – Oven Manufacturing

The newly appointed Ernst Rilling, the son of the company's founder, successfully leads the company through the difficult post-war era.

E. E. Rilling – Metal Construction

Ernst Eberhard Rilling, the son of Ernst Rilling, joins the company and begins to realign it. Starting with steel working counters for bakeries, soon equipment for commercial kitchens is developed, manufactured and sold, paving the way for the manufacturing of commercial kitchens made of stainless steel (AISI 304).

1896

1946

1968

Our Company's History

A lot has changed over the years. But right from the beginning up until now and throughout our company's eventful history, one fact has always been true:

Our competence as German manufacturer.

E. E. Rilling GmbH & Co. KG

Dieter Rilling, the brother of Eberhard Rilling, joins the company. Under the leadership of the two brothers, the company expands rapidly and becomes a leading manufacturer of commercial kitchen equipment.

1978

Rilling, CH

A manufacturing facility in Switzerland is being established. The Rilling AG is one of the leading manufacturers of equipment and systems for hospitality and catering service businesses.

1981

Cool Compact Kühlgeräte GmbH

Cool Compact is founded in Nehren by the two brothers Eberhard and Dieter Rilling, focusing on commercial refrigeration equipment. Dipl. Ing. Markus Sidler, Eberhard Rilling's son-in-law, is the product developer and design engineer of the new company. In 1996, Markus Sidler is appointed Managing Director.

1995

Cool Compact Kühlgeräte GmbH Grosselfingen

By relocating sales, administration and manufacturing to Grosselfingen, along with extensive new measures in the manufacturing processes, the foundation is laid for the company's evolution into a leading supplier of commercial refrigeration equipment. Product development and optimization are being improved and advanced.

2000

2001

Cooling counters with foamed-in evaporator

With a constant focus on quality and innovation, Cool Compact introduces the foamed-in evaporator as part of the series production of its cooling counters. To date, this defines a crucial component for the success of this product segment.

2004

Refrigerators / Freezers, MAGNOS 650 Series

This series highlights Cool Compact's success strategy. Consistent implementation in regards to the process quality and used materials define new and higher standards in the industry.

2006

Manufacturing Plant in Poland

Expansion of the manufacturing capacities and possibilities with the construction of a state-of-the-art manufacturing plant for components in Poland.

Our Company's History

2009

Beverage Refrigeration Counters

With the addition of the beverage counters, the product portfolio is being expanded by another extensive product line. Today, this product line is an important revenue source. Its modular system is designed to create individual, specific solutions with standard elements.

2015

Refrigerators / Freezers, MAGNOS / Melios 570 / 590 Series

The evolution of refrigerators and freezers in terms of energy efficiency and perfectly designed, hygienic interiors sets new standards in sustainability and ecology. The 570 / 590 series define a new standard for GN 2/1 refrigerators.

2018

Expansion of the Grosseelfingen Site

Due to the continuous growth of the company, an expansion of the corporate headquarters in Grosseelfingen is possible. Thereby, Cool Compact consolidates the importance of its German Grosseelfingen location. With the construction of a new warehouse and logistics center, the manufacturing capacities are increased. Along with the construction of the new sales and administration building, Cool Compact readies itself for the future by offering training courses and seminars in Cool Compact's Forum for more and personal interaction with the company's customers.

2020

Blast Chillers / Blast Freezers Vintos

Vintos and Vintos+ are the first blast chillers / blast freezers entirely manufactured in Germany available in different sizes. The Vintos+ models are multi-functional appliances which, in addition to cooling and freezing, can also thaw, keep food warm or cook at low temperatures. To date, innovative features, such as Smart Door Automatic or Smart Level Control, are unique and offer the user a significant additional benefit.

Out-of-the-box ideas coupled with the passion for striving for perfection and highest efficiency, have always been the ideal constellation for great inventions and products from

From the heart of Baden-Württemberg to the entire world

Baden-Württemberg. Perhaps it is the unique landscape, the impressive Swabian Alb, or the fascinating views of valleys and castles that have inspired and fostered the inventive spirit of the Swabian people for centuries. Cool Compact consciously lives and continues this tradition. Here, for over two decades, our highly qualified team has been producing refrigeration units, which are valued by industry professionals all over the world and define the „state-of-the-art“ standard, in both their technical and visual design.

When developing our units, the focus is on the customer. It is the customer, who benefits from the sophisticated functionality of our units, which is constantly being optimized and adapted to the daily requirements of a modern commercial working kitchen in close cooperation with industry professionals. Sensible solutions and practical features guarantee a smooth, smart and stress-free every-day workflow.

Because of the fact that we live in and work surrounded by this idyllic environment, it is important to us that our refrigeration units operate sustainably and energy-efficiently, in an effort to making a valuable contribution to the preservation of our environment.

So that our beautiful surroundings may continue to inspire generations to come and spark new ideas for great and fascinating products.

Made in Germany

**»We are not only
your supplier,
we are also part
of your team«**

Andreas Lindauer,
Managing Director Sales / Marketing

It is only with the conceptual integration of all technical possibilities that the performance capacity of a commercial refrigeration unit can be fully utilized. In order to do so, it is oftentimes necessary to adjust existing daily working routines and procedures. As your competent partner and prior to your purchase, we offer our extensive support and expert advice specific to your individual needs. Our area sales team offers local support and guidance with the planning of your new investment.

Even after your purchase, you can count on our continued and comprehensive support

services. Once the appliance is delivered and installed, the instructional presentation of its features by one of our own professionals enables the user to not only operate the appliance properly but to also understand all of the practical advantages and to make use of its full performance capacity.

Yours,

Andreas Lindauer
Managing Director Sales / Marketing

Our newly-created Cool Compact Forum at our manufacturing facility in Grossefingen provides an ideal platform for seminars and

More than »just« refrigeration equipment

training courses. Here, we offer hands-on events and informational seminars.

When operating a commercial refrigeration unit there are certain fundamentally important technical aspects that need to be considered. For any questions regarding location, external single-cooling unit, acoustic, heat and noise emissions we'll gladly offer our advice and support to our customers.

In 80 training courses per year, we inform and educate our end customers about - for example - the controlled food preparation system. These seminars are offered and can be attended at one of our local commercial kitchen wholesale partners or at one of our nationwide training facilities (e.g. trade schools).

After your purchase, we offer continued support to our clients. We work closely with chefs and industry professionals. After the unit's installation, our experienced support staff advises clients on location and provides valuable hands-on information based on their very own practical experiences with the daily operation of our appliances.

Competent and committed employees, who fully support their company and identify

A modern work environment for a strong team

with it and its values, are the indispensable foundation for a well-functioning company.

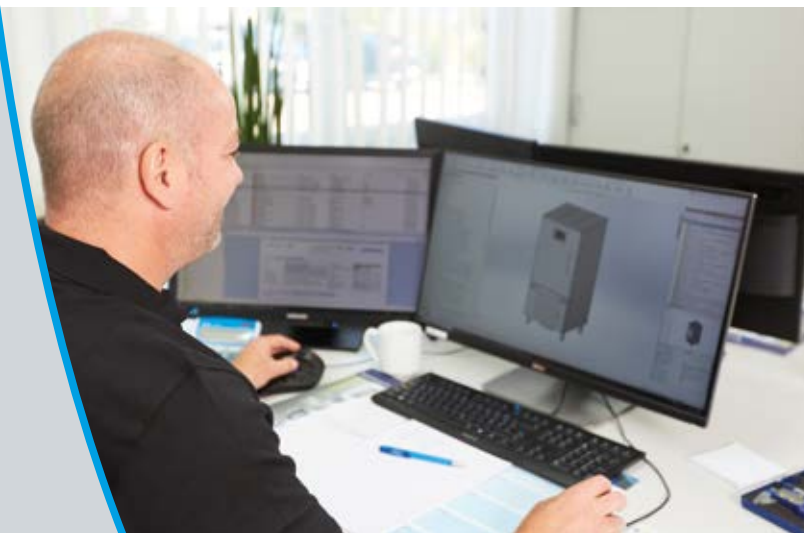

This holds true for Cool Compact: Our team is made up of well-trained and motivated colleagues, all of whom – and most of them as long-term employees – have had their share in the success of our company.

Our positive work climate plays a critical role in the excellent inter-departmental communication, in lowering error rates and achieving outstanding results.

Furthermore, our new offices certainly contribute to the pleasant work atmosphere: In 2019 we moved into our newly created sales and administration building. Since then, bright offices, equipped with modern, ergonomic furniture, nicely designed social rooms as well as effectively planned production and storage halls for short walking distances and well thought-out work processes, have simplified and improved the everyday workflow.

As a result, and one of the positive side effects is the above-average number of long-term employees, who – with their many years of experience – are a valuable and reliable support for the company. This, in combination with our young colleagues, creates a perfect mix of fresh, impetuous vigor and proven routine and prudence.

Our Team for You

Together, we have made it our mission to deliver the most advanced cooling devices, the most comprehensive service and thus the best overall product to our customers.

Above: A bright, modern office space, equipped with ergonomic furniture for a comfortable and efficient work place.

Left side: Whether in product development / construction, manufacturing or administration: Cool Compact offers interesting workplaces for many different professional groups.

Right picture: A cup of coffee among colleagues for new energy during a break nurturing a good work climate.

Anyone who buys cooling devices from Cool Compact can be sure to be receiving products that are the result of many years of close cooperation with renowned industry

who speak "your" language as well as a fast delivery within a few days allow for a quick installation of our cooling devices without causing major disruptions in your day-to-day business.

Our products for professionals

professionals. As the largest German manufacturer of cooling devices, we are proud of our wide range of high-quality and reliable products. Not only do they integrate seamlessly into your everyday workflow, but they also facilitate new, efficient work processes due to a large range of technical possibilities.

Extensive testing of each individual device before delivery, comprehensive training on location by specialists

Professionals in the hospitality, catering service and hotel industry, work with Cool Compact – a fact on which we are proud of.

Prestigious clients trust in Cool Compact

You can find refrigeration technology from Grosselfingen in many renowned and well-known establishments all over the world.

- The Fontenay (Hamburg)
- Kempinski Hotel (Kairo)

Our extensive product range of refrigerators and freezers offers the best solution that suits all project needs and budgets.

The right product for your individual project

Competitively priced, the **610 series** (GN 2/1) offers a high quality product, equipped with many features of our premium model series.

The **570 MAGNOS series** (GN 2/1) impresses with an outstanding price-performance ratio, a high energy-efficiency and is available in many different variations.

Our **410 series** is designed to fit into smaller working spaces due to its compact design.

Cool Compact's **590 Melios series** (GN 2/1) offers LED-lighting, a door opening pedal and maximum energy efficiency as standard features.

The **620 series** (GN 2/1 and EN 6040) includes our 2-temperature-refrigerators with our reliable technology.

Finally, convenient roll-in and roll-through fridges and freezers are part of our **710 series**.

90mm insulation, hygienic interior with shelf tracks (570 MAGNOS series /590 MELIOS)

Deep drawn floor pan with hygienic radius (570 MAGNOS / 590 MELIOS)

Airtight magnetic door gasket for improved energy efficiency.

Refrigerators/Freezers

All of our model series feature:

- Maximum efficiency by using the standard refrigerant R290.
- Interior and exterior are entirely made of stainless steel (AISI 304): Durable and hygienic if properly cared for.
- Units' bodies are efficiently insulated and energy saving.
- Temperature range from -2°C to +12°C or -15°C to -22°C.
- The refrigerators and freezers are specifically configured for Gastronorm or EN 6040.
- The evaporator and technical components are placed outside of the cooling chamber, leaving the interior of the unit hygienic and easy to clean.

Functionality in daily use is the primary focus of our product development. Various

Modify and Customize

models and options to customize your unit offer maximum flexibility and guarantee a seamless integration of our appliances into your workflow.

- Instead of doors, you can choose from four different drawer heights to configure your unit.
- Worktops are available in three different depths.
- The machine or installation compartment can be mounted on the left or right side of the appliance.
- The counters are available in six working heights
- Wide range of freezing counters. Available with reliably operating drawer runners.

The machine compartment (for built-in cooling) or the installation compartment (for central cooling) can be placed on the left or on the right side of the unit

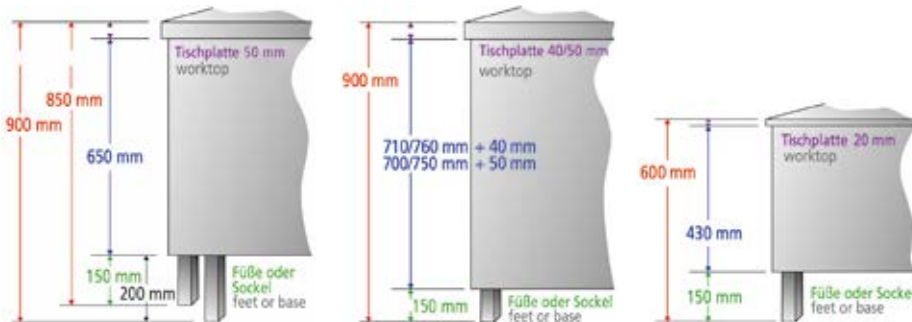

Counters and Saladettes

Cool Compact: Efficiency Made in Germany

Our latest generation of refrigerated and freezing counters is equipped with the efficient R290 refrigerant as standard. Coupled with an improved refrigeration technology,

we are setting standards in terms of sustainability and efficiency. Furthermore, Cool Compact's refrigerated counters with two or three cooling compartments achieve the highest energy efficiency rating »A«.

Quality – the attention to detail

It is the many well thought-out details and features that have been developed in collaboration with seasoned professionals of the catering industry over a number of years that highlight the advantages of Cool Compact's Vintos and Vintos+ blast chiller / blast freezer series. By applying intelligent solutions for a more focused and efficient workflow, you can improve the productivity in your kitchen and ease your oftentimes stressful daily routines.

Depending on your individual needs, choose the model that fits your project requirements best:

Vintos: Blast chiller/blast freezer with extensive programs for cooling and freezing food.

Vintos+: Multi-functional appliance with all of the features of the Vintos series. Various additional options in the thermal range, e.g. slow speed cooking of up to 80°C, proofing feature, Smart Sterilization, Smart Door Automatic and more ...

Door with magnetic gasket, bulging inwards for improved energy efficiency.

»Smart Probe«: The appliance recognizes automatically if the probe has been placed and/or if the probe has been placed correctly. Accordingly, a temperature or time-controlled program is being started.

The Smart Door Automatic for more efficiency and safety: Upon approach, a sensor in the bottom of the appliance opens the door automatically.

Blast Chiller / Blast Freezer

Hygienic and yet easily accessible: The USB port is mounted behind the machine compartment panel. Via this connection, HACCP-data can be read, recipes accessed and software-updates installed.

Our beverage counters: Versatile, sturdy and efficient

The money is made in beverage sales. It is therefore crucial to present beverages clearly visible to the guest. At the same time, because of contact with heavy beverage crates and kegs, a sturdy design of these cooling counters is indispensable for their durability. Our portfolio for beverage cooling:

Bottle cooling counters

Cool Compact bottle cooling counters impress with their large capacity, glass doors and LED

lighting, which allow for a nice presentation. The automatic energy-saving mode increases efficiency.

Standard beverage counters

The COMFORT-line focuses on design details, the MAGNOS-Line is basic and sturdy. Both lines can be customized by choosing doors and / or drawers and expandable with modular units.

Modular system

With the Cool Compact modular system you can tailor and customize your beverage counter to your specific needs from a set of standardized modules.

Beverage Counters and Waste Disposal Coolers

Huge quantities of food waste are generated when working in a commercial kitchen, posing

Safe and sanitary storage of food waste

a significant risk of creating a source of unwanted odors, contamination and bacteria.

Kitchen waste must be stored safely and hygienically in order to reduce the potential risk of foodborne illnesses from contaminated food waste.

Cool Compact's waste disposal coolers offer a sanitary solution for holding food waste. They are made entirely of stainless steel (AISI 304).

The corrosion-resistant quality of the material, guarantees a long product lifetime. This is particularly important since food waste can cause aggressive vapors and acids that can attack metal surfaces. The composition of Cool Compact's waste disposal coolers allows for a quick and easy cleaning. Apart from the fans, the interior of the unit is free of any technical components. The evaporator is foamed into the back panel of the cooler's body.
